Javascript, d3.js, php, html5, css, webpack, svg, react.js, git, parcel.js

EXPERIENCE

Radiolocus, Mumbai and Bangalore – *Frontend Developer*

MAY 2015 – SEPTEMBER 2018

Lead frontend team while playing a role at intersection of engineering and product. Gained experience in customer centric approach to solving issues related to **navigation, user path**, data analytics and telling a story through data so as to enable users to make informed decisions.

Built multiple dashboards and utilities with features such as:

- D3 based visualizations
- Code splitting
- Custom Datepicker utilities, Graphs etc.
- Custom export utilities
- Client Based Customizations
- Complete php layer for authentication, jwt, session management
- Logging functionality etc.

EatAds, New Delhi – *Web Engineer*

NOVEMBER 2014 – APRIL 2015

Worked with a small team of six engineers to build a web and mobile app for outdoor media:

- Web platform for updating the project/campaign data
- Dashboard for advertisers to check the progress of campaigns and on different campaign sites
- Image manipulation
- Web app and mobile app integration.
- Build Stack: php, JavaScript, HTML, CSS

Twyst, Gurgaon – *Developer*

JULY 2014 – NOVEMBER 2014

Worked with a small team of four developers to build the web platform of the hyperlocal startup Twyst :

- Web Platform for Merchants to log in and see their data.
- Platform for users to discover the places to eat
- Reward system for each consecutive visit
- Build Stack: Angular.js, d3.js, JavaScript, CSS, node.js, mongodb

GetFitGo, Mumbai – *Senior Web Developer*

APRIL 2014 – JUNE 2014

Worked with a team of three engineers to develop a social network for fitness enthusiasts with features such as:

- Suggested Friends
- Leadership Board
- Community Boards
- Closed Groups/Community
- Automated Sync with devices like fitbit.
- Utility for installing and updating devices from windows and mac.
- Build Stack: Ruby on rails, JavaScript, HTML, CSS, C++
